

AIR 2023

The 6th Int'l Conference on Artificial Intelligence and Robots (AIR 2023) will be held during July 14-16, 2023 in Guilin, China. AIR 2023 will cover issues on Artificial Intelligence Applications, Artificial Neural Networks,

Machine Learning, Multidisciplinary Topics and Applications, Robot Sensing and Mobile Sensor Networks, Robotics, Perception and Computer Vision, Signal and Image Processing, etc. It dedicates to creating a stage for exchanging the latest research results and sharing the advanced research methods.

CALL FOR PAPERS

Adaptive Control
Agent and Multi-Agent Systems
Artificial Intelligence Applications
Artificial Neural Networks
Bayesian Networks and Bayesian Reasoning
Cognitive Systems
Data Mining and Integration
Fuzzy Sets and Soft Computing
Human-Machine Interaction / Presence
Information Retrieval and Fusion
Intelligent Information Systems
Intelligent User Interfaces
Knowledge Representation, Reasoning and Logic
Machine Learning
Multidisciplinary Topics and Applications
Robot Sensing and Mobile Sensor Networks
Robotics, Perception and Computer Vision
Signal and Image Processing
Speech and Natural Language Processing

WeChat: 3025797047

Official Account: Academic Communications

Venue

Located in the northeast of Guangxi Zhuang Autonomous Region in south China, Guilin is considered to be the pearl of China's thriving tourist industry on account of the natural beauty and historic treasures. Covering an area of about 27,800 square kilometers (10,734 square miles), the city is rather compact when compared with other major tourist cities in the country. The stunning landscape in which the city is situated has a kind of magic that is all its own.
