

SSCIS 2023

2023 Int'l Conference on Solid State Chemistry and Inorganic Synthesis (SSCIS 2023) will be held during July 14-16, 2023 in Guilin, China. The conference will cover issues on Solid state chemistry, Bonding in solids,

Crystal chemistry, Synthesis of new compounds, Materials chemistry, Solid-state inorganic materials, Solid state reactions, Atomic and electronic structure of solids, etc. It dedicates to creating a stage for exchanging the latest research results and sharing the advanced research methods in related fields.

CALL FOR PAPERS

Solid state chemistry
Bonding in solids
Crystal chemistry
Synthesis of new compounds
Materials chemistry
Solid-state inorganic materials
Solid state reactions
Advances in solid state materials
synthesis, new solids and compounds
Atomic and electronic structure of solids
Photonic and optical properties of solids
Electrochemistry
Physical chemistry of solids
Microporous/mesoporous materials
Chalcogenide, oxide, hydride materials
Functional materials
Materials and processes of data storage
Materials for renewable energy
production and storage

Venue

Located in the northeast of Guangxi Zhuang Autonomous Region in south China, Guilin is considered to be the pearl of China's thriving tourist industry on account of the natural beauty and historic treasures. Covering an area of about 27,800 square kilometers (10,734 square miles), the city is rather compact when compared with other major tourist cities in the country. The stunning landscape in which the city is situated has a kind of magic that is all its own.
